BEN G. EVANS, SUPERVISOR OF RURAL MANPOWER

FRED BARRETT, ADMINISTRATOR
EMPLOYMENT SECURITY DIVISION
STATE DEPARTMENT OF LABOR & INDUSTRY

1973 MONTANA ANNUAL RURAL MANPOWER REPORT MA 5-79

Part I

ANNUAL SUMMARY

Planning

- A. The administrative organization did not change during the calendar year 1973. The organization for Montana is simple and brief due to the sparse population and lack of funds which does not allow for a large operation even though our large state could easily utilize a larger organization and budget. Rural manpower concepts continued to be incorporated into the farm labor programs. FPR's were assigned non-agricultural contacts and duties to conform with the present rural programs. More attention is to be given to rural areas. During the past two years our agency has been a division of the State Department of Labor and Industry.
- B. State and local rural placement personnel participated and cooperated with growers and processors throughout the season and attended meetings whenever and wherever things could be accomplished.

Farm placement personnel, as heretofore, continued to work throughout the year with County & State Extension Services, Montana State Department of Agriculture, Agricultural Stabilization and Conservation County Committees, and other rural and farm organizations.

C. Staff training programs relating to providing comprehensive manpower services to all rural residents and encouraging a greater commitment to solving the problems of rural areas was carried out by quarterly visits to local offices by the Supervisor of Rural Manpower and by staff meetings held in local offices. Field Supervisors were also engaged in this activity. Central office memos were utilized in staff meetings by local office Rural Placement Representatives. The main objective was to instill in local office personnel the importance of giving the same service to the rural applicant and employer as that given to the urban applicants and employers.

Economic Developments

Montana has several developments in the past few years that have had an impact on the operation of Rural Manpower Programs. Power plants and strip coal mining is increasing in the Colstrip area of eastern Montana causing an influx of new residents and employment. Recreational ski areas are on the increase. The most recent being the Big Sky Resort of Chet Huntley's in the Bozeman area.

A. <u>Impact of Rural Industrialization and Related Developments</u>

1. Industrial developments in Rosebud and Gallatin Counties, as indicated above, are industrial developments affecting the labor market in those counties. Otherwise there are no major changes.

Agricultural enterprises are very similiar to the previous year. There was an increase in grain crops as well as sugar beets. Some of

this was slowed by lack of moisture despecially in the north-central area of the state. Turnover of labor was insignificant. Hay demands were great. Exchange of stock to winter and sum er ranges were normal. Labor was adequate for all crops including the T-xas-Mexicans in sugar beet fields. An average supply of labor migrated into the state. There were some spot shortages in various areas.

- 2. The impact of rural development activities in several counties is creating some population growth. Actually western counties are having a growth increase where eastern counties, except Cascade and Yellowstone, have had decreases.
- 3. There is no significant shift among rural occupations and industries except in the Colstrip area. Mining areas remain stable. There was some increase in demand for white collar workers in Lewis & Clark County due to increased State and Federal agencies. A decreased demand for unskilled labor was rated in agriculture. However, there was an increased demand for skilled labor in the same area.
- 4. There were no significant changes in the demand for women, youth, and elderly in the rural worker group.
- 5. Vocational training increased in Job Corps areas and most trainees were from communities of 2500 population or less. The impact on the labor supply will just about parallel the previous year.
- 6. Texas-Mexican sugar beet crews continue to migrate into Montana rural areas. These migrants continue on to Colorado, Ohio, Michigan, etc., when work is completed here. Some migrants remain for our cherry harvest or on general farm work. Flathead and Lake Counties are migrant points for cherry pickers who migrate from Idaho, Washington, Oregan, and California each season.
- B. <u>Impact of Agricultural Mechanization</u>, Changing Production Techniques, and Other Shifting Agricultural Trends

Mechanization of agriculture continues to have an impact on Montana as job opportunities decrease in quantity but increase for quality applicants. Actually shortages continue for good reliable skilled help. Grain continues to mechanize as do sugar beets. Feed lots continue to grow for cattle feeding. The potato crop is fully mechanized.

Employment and Unemployment Trends

A. Rural Non-agricultural Trends

Some rural counties continue to have sub-standard wages, which cause a shifting of applicants to urban areas. Manufacturing is insignificant in the rural areas.

B. Unemployment Trends

Unemployment trends in rural counties did not change significantly in 1973. There is a general decline during the winter season especially in the recreational camping, forestry, and park areas. Employment in the ski areas increase. Unemployment rates are generally greater in the rural counties during the winter seasons.

C. Farm Employment Trends

Overall farm employment did not change too much from the previous season due to increased crops but less production in the drought areas.

- 1. As to major characteristics of seasonal workers, all ages above 16 are employed. The elderly are utilized well in agriculture on general farm and ranch work. Age, sex and race play no important part in Montana's agricultural employment. Women are used frequently as truck drivers during the sugar beet harvest.
- 2. Major activities are Sugar Beets, Cherries, Field Corn, Grain and Cattle. About 2000 Texas-Mexicans in crews or family groups weed and thin Montana's sugar beet fields. Weedicides, mechanical thinners and weeders cause reduced labor requirements each year. Only two of the previous five sugar companies now process sugar beets. At one time 10,000 beet workers migrated into Montana. Local help and machinery takes care of the sugar beet harvest. One thousand, two hundred (1,200) cherry pickers take care of the cherry harvest. This is still hand picking except for the sour cherries which are harvested by use of shakers. Local help takes care of the corn harvest and small bean harvest.

Grain is harvested mostly by custom combines migrating into the tate following the harvests from Texas to Canada. General farm and ranch work is taken care of by about 6,500 individuals migrating into Montana each season. Local students fill vacancies during vacation periods.

- 3. Shortages of farm and ranch hands exist each spring and fall prior to and after migrations and school vacations. Surpluses exist all during the winter season except for skilled workers. Weather and lack of fringe benefits are the main causes of shortages. Weather also causes the surpluses. School terms which continue into June and start again in September cause some shortages. Lack of year around employment causes lack of applicants.
- 4. With increased mechanization farm families are doing much agricultural work which previously necessitated hired hands. Consolidation of farms continues to have its effect.

Services for Rural People

- A. All services provided urban applicants and employers are attempted with rural applicants through Volunteer Rural Representatives. Due to lack of budget we are unable to provide personnel and mobility to rural areas to the extent we would like to have it.
- All rural job seekers have access to counseling, testing, placement, referral to training and manpower programs, supportive services or referral to agencies providing needed services and follow-up at the local office site. Outreach programs are operating periodically by personal contact, phone, or letter through Rural Placement Representatives in each local office.

 (Figures provided in part II)
- B. Special services are provided to veterans, youth, the disadvantaged, Indians and older workers by specialists assigned to the above groups in each local office.
- C. Our Minority Worker Specialists work with all seven Indian Reservations.

Our All Indian Job Corps Center has trained and is training numerous Indian trainees.

- D. Outreach activities in all programs is the main emphasis in Montana. Itinerant services are used when helpful to Indian Reservations.
- E. The Administrator of Employment Security is Chairman of the Governor's CAMP's committee where rural problems and programs are coordinated with other agencies. We work closely with the Montana Migrant Council and Indian Training Programs.
- F. The Rural Placement Representatives in the local offices make regular public relations visits to agencies, schools, ag, and non-ag employers on job development as well as making promotional calls and sending out promotional letters. These include employers who have not used the agency.
- G. Rural job information is disseminated to rural areas by a Farm and Rural Manpower Bulletin to each Volunteer who posts such information in his establishment. Each Volunteer has free telephone service to the local office for access to any information listed with the local office. In one area senior citizens operate an information and job service under the guidance of the local office. All local offices having access to radio or tv stations broadcast job opportunities periodically.
- H. People planning to move out of rural counties have access to information in other areas by contacting their Volunteer in the community or through their local office. Interviewers will supply rural persons with job opportunities in other areas.

Rural Manpower Programs and Activities for Farm Workers

A. All media of advertising is used by local offices to disseminate job opportunity information to job seekers. Volunteer Rural Representatives act as information offices in this regard.

We have very little problem with displaced farm workers. We have no problem with cooperative efforts with public and private organizations in promoting farm workers' employability and to improve manpower services. The relationship is non-antagonistic in most instances. Volunteers are used in all feasible areas however due to the fact there is no remuneration other than community service all Volunteers do not function as they should. We use posters at times, letters at times, bulletins, radio, tv, etc. for recruitment purposes. We could improve our services if we could get funds for additional personnel, travel, mobile units or itinerant service. If the small offices, we once had in rural areas, could be reactivated, it would be a real help to those areas which are difficult to serve under the present circumstances.

- B. Up until the last several years we participated in the annual worker plan but since we no longer recruit beet workers for the growers or sugar companies. the annual worker plan is not applicable to Montana. The growers do their own recruiting thus avoiding the housing inspections we conducted prior to the change. Since our cherry growers do not have housing, no interstate recruitment is requested.
- C. We received 109 job openings through Interstate Clearance. We had but one housing inspection on a sheepherder order. Thirteen (13) interstate orders were received. One order for 8 openings was extended to Texas.

- D. Since we do no recruiting of migrants most of this section is not applicable to Montana. We do offer all upgrading services to migrant workers that we do to others when they contact our local offices.
- E. We had no farm management or foreman training programs during 1973.

Rural Manpower Service Participation in Community Development Activities

The Concentrated Services program in Roundup is continuing.

Public Relations Activities

The Montana Agency participates with farm and rural organizations and has good relationships with labor organizations, civic groups and clubs. The media of news articles, radio and tv are used frequently. The local offices carry out a public relations program in their areas.

Evaluation, Problems, Plans, and Recommendations

A. Evaluation

Part II contains a statistical report on results of past three years.

We feel the agency efforts have been successful with the limited budget with which we are working.

B. Problems

The main problem with rural manpower in Montana is distances. One can travel over 700 miles from corner to corner of the state and with only 700,000 people in the state, it takes money to serve the rural areas. Since budget is allowed on a population basis, we are limited in how much we can serve remote areas.

C. Plans

We plan to carry on very much the same in 1974 as we did in 1973. We feel our program is as full as we can get it under the financial situation.

D. Recommendations

We would recommend the rural manpower budget be alloted on an area basis as well as a population basis.

All Local Office Managers and Field Supervisors

SUBJECT: Rural Manpower Accomplishments

Attached are the results of local office efforts over the past three calendar years to improve services to our rural areas. Some results are very good. Some not so good. The overall results were very successful.

The criteria used was that which was outside each local office urban boundary.

Hereafter starting with January 1, 1974, a new rural criteria begins. All cities of 10,000 population or less will be rural and those over 10,000 will be urban. This has not been made official yet but since Rural Manpower reports are on a calendar year basis we will begin our 1974 statistics with the new criteria.

TOTALS	12,123	10,174	16,601

We surpassed last year by 1949 placements. Good Going! It is interesting to note that when we subtract the 5,036 beet placements from the 1971 figures of Glendive, Miles City and Sidney we have 11,565 placements which means we still show an increase of 558 placements on the results of two years ago. We commend those offices showing improvement.

ne on the ro ng less home

By ROGER CLAWSON Chief Staff Writer

The day of the hired man - cowpoke or farmhand - is

The day of the "agricultural worker" is dawning - a day n cowpokes will punch time clocks and "hands" will w unemployment checks.

ACROSS MONTANA, hundreds of farm and ranch jobs begging for takers, report officials at the state Employat Security Commission.

Farmers are competing for the same skilled or semiled labor pool tapped by construction companies, packing pints and other urban industries.

"The difference is," says Clarence Nybo of the Employt Security Commission office in Billings, "farmers don't at to pay as much."

Farm and ranch operators, in an attempt to cut their lacosts, have largely mechanized their operations.

As a result, farmers and ranchers use fewer men, but are ing a tougher time finding them.

IN DEMAND on the farm and ranch is a mechanically lined worker who can operate and care for machinery costtens of thousands of dollars.

"The same man can go to work for a construction compaand draw \$6 an hour," says Nybo.

"He's not likely to be tempted by the farmer's offer of

0 a month." Grain farmers are looking for men to drill spring wheat.

Sheep ranchers are looking for able hands to serve as twives for lambing ewes.

Large cattle operations are searching for cowboys to help ing calving.

But there are few to be found, reports Nybo.

Dwight Svenson, a ranchhand for most of his 47 years. s some of the reasons why:

"There are better jobs to be had," he says.

"A MAN works 10 to 14 hours a day, and draws \$250 a onth in the winter and \$300 in the summer. He'll never get

Ranchers argue that their hands receive benefits that put m in a pay class far above the \$300 mark. Ranch hands tally receive room and board in addition to their pay.

But Svenson notes:

"The room is all too often a sheep wagon out on the ge or a bunk in an outbuilding

"The board is usually good, but when you're herding

ep, you cook for yourself."

And - while not discounting the value of room and rd - Svenson looks at the benefits farm and ranch workdo not receive:

"WHEN A meat packing plant worker is laid off, he can w unemployment until he can find another job.

"But a ranchhand can be cut loose with just his back pay nis pocket. There's no unemployment insurance for him.'

And - although the accident rate is far above the nationiverage - cowboys and farmhands go largely unprotected. "I was working for a rancher near Scobey when my horse

a badger hole and fell.

"The rancher took me to town and dumped me at the

'I wasn't paid for the time I was in the hospital and I ed the hospital bill myself. I came back to work so stove that I had to herd sheep on foot."

MOST URBAN workers are covered by Industrial Accident Insurance; most farm and ranch workers are not.

Svenson was born on a sheep ranch. His father lost the family homestead when the Depression drove down wool and hamb prices.

But, unlike most bindless sons of the Depression, Svenson was unwilling to become citlfied.

He loves the outdoors and he loves his work.

"When I save a lamb, I feel I'm putting money in the boss's pocket," he says.

But Svenson is part of a dying breed.

Most young men today grow up in urban surroundings. Those who would be willing to tackle the long hours farm and ranch work demands do not have the experience.

And, as a consequence, farmers and ranchers are learning to do without much of the help they once hired.

The large Koyama farming operation near Hardin once imployed five men to irrigate sugar beets, another 25 migrant laborers hoed the beets and at harvest time an extra 20 men were hired to dig and deliver the beets to the Holly Sugar Factory acarby

Today things have changed.

THE KUYAMAS now raise feed grains. The three sons of Koyama do all the work until harvest time. Two men. sking a few short weeks during harvest time, complete the

Koyama work force.

The Hope Ranch near Bighorn once competed with cattle operations in the scramble to hire workers during haying season.

Today, massive (and expensive) machinery replace dozen or so men who harvested the hundreds of acres of his

Cattle feeding operations once provided winter johr wandering cowboys. Here, too, machinery is replacing in with pitchforks.

T-Bone Feeders near Shepherd finishes 75,000 canh year. The operation employs more than 80 persons -4 only 35 cowboys; the rest ride herd on the company's page

BUT DESPITE increased attempts to run "no hand agricultural operations, the need for good farm and runch workers is growing more severe.

"It is always bad in the spring," says Fred Barrett, ministrator of the Montana Employment Security Commis-

sion. "This spring it's worse."

sourcett sees two forces pushing for beefed-up benefits int agricultural workers:

Agricultural operations competing for labor with has industries are beginning to offer more enticing fringe ts to attract the men needed.

Federal forces are at work to spread the coverage of unemployment appropensation and industrial accident insurance to all workers, including those on farms and ranches.

**TRADITIONALLY, farmers and ranchers have avoided baing included in these programs." says Barrett.

But President Nixon has sent a message to Congress asking that the unemployment insurance program be extended to cover agricultural workers.

Nixon's proposal would extend unemployment insurance coverage only to the employes of large corporate farming operations - most Montana farms and ranches would not be affected.

But Barrett reads the proposal as a move toward wider

Once a program is initiated, it is easier to expand it," he

has already made the the industrial accident coverage for move toward providing agricultural workers.

February (, 1973

In a review of our records for February of 1972, it was noted that you had contacted our office in Great Falls for farm help. Thus far this year we have not heard from you.

If you have grain to haul, stock to fred or are going into your calving or lambing season, give us a call if you are in need of extra help.

Presently we have a number of workers available who have the experience and qualifications that you require. You may contact us by phone or by stopping in our office at 1018 Seventh Street South. Our phone number is 761-1730.

Sincerely,

Roy O. Young Farm Representative

Unemployment Insurance

Dear Sir:

As you realize the time is fast approaching when preparations will have to be made for the coming farming season. Not only will machinery have to be put into good operating shape but additional help will have to be employed to get the job done.

The recruitment and placement of hired help is an important factor in this area, especially at this time of the year. More farm operators utilize migrant workers to get the spring activities started than at any other period except during harvest operations.

Many operators realize that by placing orders early their chances for getting adequate help is much better than waiting until the last minute before deciding that they need an extra hand. Therefore, it is our suggestion that if you contemplate the hiring of extra help in the near future that you place your order with our office here in Great Falls at 1018 Seventh Street South or by calling 761-1730.

Each community has a Volunteer Farm Representative who could be contacted by you and there are possibilities that he may have a local man available for you or if not he is authorized to relay the order to our Great Falls office for processing.

Sincerely,

Roy O. Young Farm Representative

Montene Stete Employment Service Unemployment Insurence

Dear Sir:

Would you be willing to employ an ambitious youth this summer? We are again expecting numerous high school and college students looking for farm and ranch work to supplement their income for the fall school term.

With the reduction of personnel at the Smelter, cut back on highway funds and elimination of the Neighborhood Youth Corps, many youths who normally relied on these activities will be turning to farm labor for summer employment.

Many of these will be experienced or semi-experienced while others can be classed as "green horns". Although some may be short in experience they more than make up for it in a "willingness to learn".

In view of the continuing shortages of farm help at peak seasons the thought of utilizing these young persons should be given your consideration.

If interested please contact our office at 1018 7th Street South or give us a call at 761-1730 in Great Falls.

Sincerely,

Roy O. Young

> Unemployment Insurance

Dear Sir:

Although the present hot and dry weather cannot be considered as being ideal for the growing of hay, extra help is still going to be needed for hay harvest.

Many farmers and ranchers in the past few years have invested in many time and labor saving devices for hay harvest. This will eliminate the needs for custom stacking crews, but by the same token this will increase the demands for a number of more experienced equipment operators. With the increased influx of workers into the Great Falls area the past two months we have found that a number of these workers are well experienced in the operation of self propelled swathers, self propelled balers, hay choppers, and automatic bale stacking equipment. In addition we will be blessed with a large number of semi-experienced school youth, many of who are familiar with haying activities.

If you are going to be in need of extra help for this coming season, we strongly urge you to contact our office at 1018 7th Street South in Great Falls or call 761-1730, and discuss your requests with one of our farm representatives.

Sincerely,

Bill (holy Bill Cady, Manager

Dear Sir:

In a matter of days the golden grain will again be pouring from the spouts of combines into granaries to complete your "payday" for this year.

With good crops expected in some areas, more workers will be needed to help complete this years harvest.

Your Great Falls Employment Office is prepared to help you find these additional workers.

Raising food crops for our nation's and the world's millions is your business. Recruiting, selecting and referring workers to help you harvest your crops is our business.

We are proud to be able to give you this service, without charge.

This year don't spend your valuable time looking for harvest or other farm workers. Telephone, write, or drop into your Great Falls Employment Office and ask one of our trained Employment Service people to refer qualified workers to fit your particular needs.

Sincerely.

Farm Representative

OFFICIAL BUSINESS

Getting More Out of Your Workers

FARMERS and ranchers now-adays have become more conscious of the fact that in order to continue on a profitable basis more efficiency has to be realized in their daily operations.

They are well aware of the productivity of various farm implements and tractors. So they invest large sums of money in this equipment and over a long period of time, it will pay off. Competition is also quite keen in the fertilizer business and it is one of the major investments by which increased production is realized.

How about the regular and seasonal hired workers? These too require a definite investment and with the increased costs of bullding materials many of us think twice before either remodeling or building adequate housing for these workers. During these past few years farmers and ranchers have become more aware of the fact that they are in competition with non-agricultural employers for these workers. It seems that the natural trend of workers is to go into the Urban Communities to seek a more stable and routine type of work.

The hired worker of today not only is usually required to operate large, expensive farm equipment, but also to be able to repair and maintain them along with a knowledge of carpentry and welding. How can the farm or ranch operator compete with industry in attracting a person such as this to either stay in agricultural work or to return to it? How can the farm operator offset the fact that usually his operation requires the services of his workers at least 10 hours a day, 6 days a week, as opposed to industrial workers, working 8 hours a day and 5 days a week with overtime pay over 40 hours? So other incentives will definitely have to be offered in order to maintain an adequate supply of this type of worker.

The pay package - cash - to the worker in most cases is the most important facet of benefits received for his services. Most of us will readily admit this. In addition, an important part of the pay package is also made up of non-cash benefits. Housing is an important factor - both for single and married couple. The day of the out door privy and hauling water by the bucket should have been phased out years ago, but it is surprising at the number of farms and ranches where this situation still exists. Other important non-cost benefits could also include adequate time off, meat or produce of the farm, gasoline allowance and a health insurance plan. These added attractions really don't compete with industry which in many cases provide health and welfare insurance, paid vacation, sick leave and retirement plans, and in addition an attractive wage which the farmer or rancher in no way can equal. Another incentive that has been offered by some operators is the profits from a certain number of acres of farm land, the profits from so many head of stock, or the privilege to run, free of cost, so many head of cows or sheep on the rancher's land. Also, periodic increases in wages or privileges would also help make a worker feel that his services are appreciated.

Have you often observed some neighbor's operation and wondered why he has no or little turnover of help or the workers say that he is a good man to work for or vice versa? Maybe you're the one that has no problems and your neighbors have a stream of workers coming and going. Granted it may not be the employer's fault, but in some instances it is. And generally it is found either a low wage is offered, housing is inadequate, a required day's work is too long or the workers are treated with indifference.

Good relations between employer and employee are definitely essential and if they are,

the worker will more than likely have the feeling that he is of some importance and is contributing his share to the success of the farm business. So why not give it a try—if you have a good worker, why not make work easier for him and try to eliminate some of the duties that may tend to be disagreeable — show him your appreciation.
